## PROJECTS

---

Skill-Bridge — Freelancing Platform Full-Stack Developer |

React, Django, Stripe, SSLCommerz

MAR 2025 – Apr 2025

- Developed a full-fledged freelancing platform enabling buyers to post jobs and hire sellers for digital services. Integrated Stripe and SSLCommerz payment gateways for seamless international and local transactions. Implemented role-based authentication, real-time dashboards, custom review/rating system, and order tracking. Built responsive React UI with chart-based analytics (Chart.js) and custom icon systems for dashboard statistics.
- Designed secure Django backend APIs with JWT authentication, custom user models, and permission control.
- 

## EDUCATION

---

Phitron.io (Online)

Professional Software Development Course (1.5 years)

2023 – 2025

- Covered Data Structures & Algorithms, Web Development (Django & React), System Design, and DevOps.
- Completed over 50+ real-world projects and problem-solving assignments.

## SKILLS

---

- Languages : Python, JavaScript, C++, Java, TypeScript
- Frontend : React, HTML5, CSS3, Bootstrap, Tailwind
- Backend : Django, Django REST Framework, Node.js
- Database : PostgreSQL, MySQL, MongoDB
- DevOps & Tools : Git, Docker, AWS, Firebase, Stripe, SSLCommerz
- Others : REST API, JWT Auth, Chart.js, React Hooks, Redux

## Achievements

---

- Designed Scalable Database Architecture (2025): Built an optimized PostgreSQL schema for a Django freelancing platform, implementing indexing, query tuning, and transaction control—cutting latency by 70% and preventing deadlocks.
- Built Asynchronous Task System for High Load (2025): Developed a robust Celery-Redis job queue for background tasks like payments and emails, enabling high traffic support with zero downtime and scalable performance.
